# TRANSITIONING FROM ICD-9-CM TO ICD-10-CM

### **Resource Guide & Coding Crosswalk**

Revised: August 2015

Provided as a service by Dominion Diagnostics

### **Disclaimer**

The information provided within is taken from the official version of ICD-9-CM as published by the U.S. Government Printing Office. It is being provided by Dominion Diagnostics solely as a reference tool for its clients. The responsibility to select the appropriate diagnosis codes for purposes of reimbursement lies with the provider of the services.

Dominion Diagnostics makes no representations of warranties that the information provided is error-free or that the codes listed will be accepted by third-party payers, and shall bear no responsibility or liability arising out of the use of this information.

### The ICD-10 Transition: An Introduction

On October 1, 2015, the ICD-9 code sets used to report medical diagnoses and inpatient procedures will be replaced by ICD-10 code sets. To accommodate the ICD-10 code structure, the transaction standards used for electronic health care claims, Version 4010/4010A, must be upgraded to Version 5010.

#### **About ICD-10**

ICD-10-CM/PCS (International Classification of Diseases, 10th Edition, Clinical Modification/Procedure Coding System) consists of two parts:

- 1. ICD-10-CM for diagnosis coding
- 2. ICD-10-PCS for inpatient procedure coding

ICD-10-CM is for use in all U.S. health care settings. Diagnosis coding under ICD-10-CM uses 3 to 7 digits instead of the 3 to 5 digits used with ICD-9-CM, but the format of the code sets is similar.

ICD-10-PCS is for use in U.S. inpatient hospital settings only. ICD-10-PCS uses 7 alphanumeric digits instead of the 3 or 4 numeric digits used under ICD-9-CM procedure coding. Coding under ICD-10-PCS is much more specific and substantially different from ICD-9-CM procedure coding.

The transition to ICD-10 is occurring because ICD-9 produces limited data about patients' medical conditions and hospital inpatient procedures. ICD-9 is over 30 years old, has outdated terms, and is inconsistent with current medical practice. Also, the structure of ICD-9 limits the number of new codes that can be created, and many ICD-9 categories are full.

#### **IMPORTANT NOTF:**

Your facility will have to provide the new ICD-10 codes to Dominion Diagnostics with each sample beginning in October 2015. Due to the high specificity of ICD-10, Dominion Diagnostics will be unable to translate former ICD-9 codes to ICD-10 codes.

### FAQs: ICD-10 Transition Basics

#### Official CMS Industry Resources for the ICD-10 Transition

Resource: www.cms.gov/ICD10

#### 1. What is the ICD-10 compliance date?

October 1, 2015

#### 2. Will the transition to ICD-10 be postponed?

The October 1, 2015 compliance date is firm and there are no current plans to extend the deadline.

#### 3. What does ICD-10 compliance mean?

ICD-10 compliance means that all Health Insurance Portability and Accountability Act (HIPAA) covered entities are able to successfully conduct health care transactions on or after October 1, 2015 using the ICD-10 diagnosis and procedure codes. ICD-9 diagnosis and procedure codes can no longer be used for health care services provided on or after this date.

# 4. Will ICD-10 replace Current Procedural Terminology (CPT) procedure coding?

No. This change does not affect CPT coding for outpatient procedures. ICD-10 procedure codes are for hospital inpatient procedures only.

# 5. Who is affected by the transition to ICD-10? If I don't deal with Medicare claims, will I have to transition?

Everyone covered by the HIPAA must transition to ICD-10 on October 1, 2015, including providers and payers who do not deal with Medicare claims.

#### 6. Do state Medicaid programs need to transition to ICD-10?

Yes. Like all other HIPAA covered entities, state Medicaid programs must comply with ICD-10 by October 1, 2015. CMS is continuing to work with Medicaid programs to help ensure they meet the deadline.

#### 7. What happens if I don't switch to ICD-10?

Claims for all services and hospital inpatient procedures provided on or after October 1, 2015, must use ICD-10 diagnosis and inpatient procedure codes. (This does not apply to CPT coding for outpatient procedures.) Claims that do not use ICD-10 diagnosis and inpatient procedure codes cannot be processed. It is important to note, however, that claims for services and inpatient procedures provided before October 1, 2015, must use ICD-9 codes even if they are submitted after the compliance date.

**8.** If I transition early to ICD-10, will CMS be able to process my claims? No. CMS and other payers will not be able to process claims using ICD-10 until the October 1, 2015, compliance date.

# 9. Codes change every year, so why is the transition to ICD-10 any different from the annual code changes?

ICD-10 codes are different from ICD-9 codes. ICD-10 has a completely different structure from ICD-9. Currently, ICD-9 codes are mostly numeric and have 3 to 5 digits. ICD-10 codes will be alphanumeric and contain 3 to 7 characters. ICD-10 is more robust and descriptive with "one to many" matches in some instances. Like ICD-9 codes, ICD-10 codes will be updated every year.

#### 10. Why is the transition to ICD-10 happening?

The transition is occurring because ICD-9 codes have limited data about patients' medical conditions and hospital inpatient procedures. ICD-9 is 30 years old, has outdated and obsolete terms, and is inconsistent with current medical practice. Also, the structure of ICD-9 limits the number of new codes that can be created, and many ICD-9 categories are full. A successful transition to ICD-10 will be vital to transforming our nation's health care system.

### 11. What should providers be doing to prepare for the transition?

Providers can begin to prepare by taking the following steps NOW:

- Talk with your billing service, clearinghouse, or practice management software vendor NOW
- Identify ICD-9 (and presumably ICD-10) touch points in your systems and business processes
- Identify needs and resources, such as training, printing, etc.

An ICD-10 transition plan should take into account specific practice or organization needs, vendor readiness, and staff knowledge and training.

Providers should check with their billing service, clearinghouse, or practice management software vendor about their readiness plans.

Providers who handle billing and software development internally, should plan for medical records/coding, clinical, IT, and finance staff to coordinate on ICD-10 transition efforts

A successful transition to ICD-10 will be vital to transforming our nation's health care system and essential to maintaining business operations. CMS has resources to help providers prepare for a smooth transition to Version 5010 and ICD-10. Visit <a href="http://www.cms.gov/Medicare/Coding/ICD10/ProviderResources.html">http://www.cms.gov/Medicare/Coding/ICD10/ProviderResources.html</a> to find out more. CMS will continue to add new information to the site through the course of the transition.

#### 12. What should payers be doing to prepare for the transition?

The transition to ICD-10 will involve new coding rules, so it will be important for payers to review payment policies. Payers should ask software vendors about their readiness plans and timelines for product development, testing, availability, and training. Payers should have an ICD-10 implementation plan and a transition budget in place.

CMS has resources to help payers prepare for a smooth transition to Version 5010 and ICD-10. Visit <a href="http://www.cms.gov/Medicare/Coding/ICD10/Payer\_Resources.html">http://www.cms.gov/Medicare/Coding/ICD10/Payer\_Resources.html</a> to find out more. CMS will continue to add new tools and information to the site through the course of the transition.

# 13. What should software vendors, clearinghouses, and third-party billing services be doing to prepare for the transition to ICD-10?

Software vendors, clearinghouses, and third-party billing services should talk to their customers NOW to get them ready so their claims will continue to be paid. Take a proactive role in assisting in the transition. Ask customers about their needs and establish a comprehensive approach that will deliver compatible products well ahead of the key transition deadlines. Develop testing guidelines and schedules. Products and services will be obsolete if steps are not taken now to get ready.

CMS has resources to help you and your customers prepare for a smooth transition to Version 5010 and ICD-10. Visit **www.cms.gov/ICD10** to find out more. CMS will continue to add new tools and information to the site through the course of the transition.

#### 14. Where can I find the ICD-10 code sets?

The ICD-10-CM and ICD-10-PCS code sets are available free of charge and can be found on the CMS Web site. For the ICD-10-CM (diagnosis) code sets and official guidlines for coding and reporting, visit www.cms.gov/ICD10.

# 15. Why should I start preparing now for the ICD-10 transition when it doesn't happen until October 2015?

The transition to ICD-10 is a major undertaking for providers, payers, and vendors. It will drive business and systems changes throughout the health care industry, from large national health plans to small provider offices, laboratories, medical testing centers, hospitals, and more. Plans need to devote staff time and financial resources to transition activities. The transition will go much more smoothly for organizations that have planned and prepared for it. A successful transition to ICD-10 will be vital to transforming our nation's health care system and ensuring uninterrupted operations.

## 16. What type of training will providers and staff need for the ICD-10 transition?

Training should be well underway in 2015 for most staff. Training needs will vary for different organizations. For example, physician practice coders will need to learn ICD-10 diagnosis coding only, while hospital coders will need to learn both ICD-10 diagnosis and ICD-10 inpatient procedure coding. Look for specialty-specific ICD-10 training offered by societies and other professional organizations. Take into account that ICD-10 coding training will be integrated into the CEUs that certified coders must take to maintain their credentials.

ICD-10 resources and training materials will be available through CMS, professional associations and societies, and software/system vendors.

Visit **www.cms.gov/ICD10** regularly throughout the course of the transition to access the latest information on training opportunities.

Disclaimer: The ICD-10 FAQs were originally prepared by CMS for a fact sheet as a service to the health care industry and are not intended to grant rights or impose obligations. The information provided is only intended to be a general summary. It is not intended to take the place of either the written law or regulations. We encourage readers to review the specific statutes, regulations, and other interpretive materials for a full and accurate statement of their contents.

V58.69^	Long-term (current) use of other medications (high risk medications)
^ Secondary	Use Code Only When Applicable

	Encounter for therapeutic drug monitoring
V58.83^	DEF: Drug Monitoring: Measurement of the level of a specific drug in the body or measurement of a specific function to access effective- ness of a drug.

<sup>^</sup> Secondary Use Code Only When Applicable

#### **Fifth-Digit Subclassifications for Pain Conditions**

#### 789 Other symptoms involving abdomen and pelvis:

EXCLUDES symptoms referable to genital organs: female (625.0-625.9), male (607.0-608.9), psychogenic (302.70-302.79)

The following fifth-digit subclassification is to be used for codes 789.0, 789.3, 789.4, 789.6:

- 0 unspecified site
- 1 right upper quadrant
- 2 left upper quadrant
- 3 right lower quadrant
- 4 left lower quadrant
- 5 periumbrilic
- 6 epigastric
- 7 generalized
- 9 other specified site

#### 346 Migraine

The following fifth digit subclassification is for use with category 346:

- 0 without mention of intractable migraine
- 1 with intractable migraine, so stated

### 668 Complications of the administration of anesthetic or other sedation in labor and delivery

The following fifth digit subclassification is for use with categories 660-669 to denote the current episode of care:

- 0 unspecified as to episode of care or not applicable
- delivered, with or without mention of antepartum condition
- 2 delivered, with mention of postpardum complication
- 3 antepardum condition or complication
- 4 postpardum condition or complication

#### 250 Diabetes mellitus

The following fifth-digit subclassification is for use with category 250:

- 0 type II or unspecified type, not stated as uncontrolled
- type I (juvenile type), not stated as uncontrolled
- 2 type II or unspecified type, uncontrolled
- 3 type I (juvenile type), uncontrolled

#### 249 Secondary diabetes mellitus

The following fifth-digit subclassification is for use with category 249:

- 0 not stated as uncontrolled, or unspecified
- 1 uncontrolled

#### 242 Thyrotoxicosis with or without goiter

The following fifth-digit subclassification is for use with category 242:

- 0 without mention of thyrotoxic crisis or storm
- 1 with mention of thyrotoxic crisis or storm

#### 716 Other and unspecified arthropathies

The following fifth-digit subclassification is for use with category 716:

- 0 site unspecified
- 1 shoulder region
- 2 upper arm
- 3 forearm
- 4 hand
- 5 pelvic region and thigh
- 6 lower leg
- 7 ankle and foot
- 8 other specified sites
- 9 multiple sites

#### Addiction Medicine and Behavioral Health Condition(s)

303.0*	Acute Alcohol Intoxication
303.0*	Alcohol Dependence Syndrome
291.0	Alcohol induced mental disorders:
291.0	Alcohol withdrawal
	delirium Alcohol induced
291.1	persisting amnestic disorder
291.2	Alcohol induced persisting dementia
291.3	Alcohol induced psychotic disorder with hallucinations
291.4	Idiosyncratic alcohol intoxication
291.5	Alcohol induced psychotic disorder with delusions
291.8*	Other specified alcohol induced mental disorders:
291.81	Alcohol withdrawal
291.82	Alcohol induced sleep disorders
291.89	Other
291.9	Unspecified alcohol induced mental disorders

292.1	Drug induced psychotic disorders:
	Drug induced

	onarcion(3)
292.8	Other, specified:
292.81	Drug induced delirium
292.82	Drug induced persisting dementia
292.83	Drug induced persisting amnestic disorders
292.84	Drug induced mood disorders
292.85	Drug induced sleep disorders
292.89	Other
292.2	Pathological drug intoxication
292.9	Unspecified drug induced mental disorders
305*	Nondependent abuse of drugs
305.0*	Alcohol abuse
305.7*	Amphetamine or related acting sympathomimetic abuse
305.8*	Antidepressant type
305.2*	Cannabis
305.6*	Cocaine
305.3*	Hallucinogen
305.5*	Opioid
305.9*	Other, mixed, or unspecified
305.4*	Sedative, hypnotic, or anxiolytic
305.1*	Tobacco

# Fifth-Digit Subclassifications for Addiction, Behavioral Health and Mental Health Conditions

#### 303 Alcohol Dependence Syndrome

# 304 Drug Dependence 305 Nondependent abuse of drugs

The following fifth-digit subclassification is to be used with categories 303, 304, and 305:

0 unspecified 1 continuous 2 episodic 3 in remission

#### √4th 295 Schizophrenic disorders

Includes schizophrenia of the types described in 295.0-295.9 occurring in children Excludes childhood type schizophrenia (299.9) infantile autism (299.0)

The following fifth-digit subclassification is for use with category 295:

- 0 unspecified 1 subchronic 2 chronic
- 3 subchronic with acute exacerbation
- 4 chronic with acute exacerbation
- 5 in remission

DEF: Group of disorders with disturbances in thought (delusions, hallucinations), mood (blunted, flattened, inappropriate affect), sense of self, relationship to world; also bizarre, purposeless behavior, repetitious activity, or inactivity.

#### √5th 295.0 Simple type

Schizophrenia simplex

Excludes latent schizophrenia (295.5)

#### √5th 295.1 Disorganized type

Hebephrenia

Hebephrenic type schizophrenia

DEF: Inappropriate behavior; results in extreme incoherence and disorganized of time, place and sense of social appropriateness; withdrawal from routine social interaction may occur.

#### √5<sup>th</sup> 295.2 Catatonic type

Catatonic (schizophrenia):

agitation excitation excited type stupor withdrawn type

#### Schizophrenic:

catalepsy catatonia

flexibilitas cerea

DEF: Extreme changes in motor activity; one extreme is decreased response or reaction to the environment and the other is spontaneous activity.

#### √4th 296 Episodic mood disorders

Includes episodic affective disorders

Excludes neurotic depression (300.3) reactive depression psychosis (298.0)

reactive excitation (298.1)

The following fifth-digit subclassification is for use with categories 296.0-296.6:

- 0 unspecified
- 1 mild
- 2 moderate
- 3 severe, without mention of psychotic behavior
- 4 severe, specified as with psychotic behavior
- 5 in partial or unspecified remission
- 6 in full remission

AHA: M-A, '85, 14

#### √5th 296.0 Bipolar I disorder, single manic episode

Hypomania (mild) NOS

Hypomanic psychosis

Mania (monopolar) NOS

Manic-depressive psychosis or reaction:

hypomanic manic

Excludes circular type, if there was a previous attack of depression (296.4)

DEF: Mood disorder identified by hyperactivity; may show extreme agitation or exaggerated excitability; speech and thought processes may be accelerated.

#### √5th 296.1 Manic disorder, recurrent episode

Any condition classifiable to 296.0 stated to be recurrent

Excludes circular type, it there was a previous attack of depression (296.4)

#### √5<sup>th</sup> 296.2 Major depressive disorder, single episode

Depressive psychosis

Endogenous depression

Involutional melancholia

Manic-depressive psychosis or reaction, depressed type

Monopolar depression

Psychotic depression

Excludes circular type, if previous attack was of manic type (296.5)

depression NOS (311) reactive depression (neurotic) (300.4)

psychotic (298.0)

DEF: Mood disorder that produces depression; may exhibit as sadness, low self-esteem, or guilt feelings; other manifestations may be withdrawal from friends and family; interrupted normal sleep.

#### √5th 296.3 Major depressive disorder, recurrent episode

Any condition classifiable to 296.2, stated to be recurrent

Excludes circular type, if previous attack was a manic type (296.5)

depression NOS (311) reactive depression (neurotic) (300.4) psychotic (298.0)

#### √5th 296.4 Bipolar I disorder most recent episode (or current) manic

Bipolar disorder, now manic

Manic-depressive psychosis, circular type but currently depressed Excludes brief compensatory or rebound mood swings (296.99)

#### v5th 296.5 Bipolar I disorder, most recent episode (or current) depressed

Bipolar disorder, now depressed

Manic-depressive psychosis, circular type but currently depressed <u>Excludes</u> brief compensatory or rebound mood swings (296.99)

#### v5th 296.6 Bipolar I disorder, most recent episode (or current) mixed

Manic-depressive psychosis, circular type, mixed

#### 296.7 Bipolar I disorder, most recent episode (or current) unspecified

Atypical bipolar affective disorder NOS

Manic-depressive psychosis, circular type, current condition not specified as either manic or depressive

DEF: Manic-depressive disorder referred to as bipolar: because of the mood range from manic to depressive.

#### **V5th 296.8 Other and unspecified bipolar disorders**

296.80 Bipolar disorder, unspecified

Bipolar disorder NOS Manic-depressive: reaction NOS syndrome NOS

#### 296.81 Atypical manic disorder

#### 296.82 Atypical depressive disorder

#### 296.89 Other

Bipolar II disorder Manic-depressive psychosis, mixed type

#### √5th 296.9 Other and unspecified episode mood disorder

Excludes psychogenic affective psychoses (298.0-298.8)

#### 296.90 Unspecified episode mood disorder

Affective psychosis NOS Melancholia NOS Mood disorder NOS AHA: M-A, '85, 14

#### 296.99 Other specified episode mood disorder

Mood swings Brief compensatory Rebound

#### v4th 300 Anxiety, dissociative and somatoform disorders

#### √5<sup>th</sup> 300.0 Anxiety states

Excludes anxiety in:

acute stress reaction (308.0) transient adjustment reaction (309.24) neurasthenia (300.5) psychophysiological disorders (306.0-306.9) separation anxiety (309.21)

DEF: Mental disorders characterized by anxiety and avoidance behavior not particularly related to any specific situation or stimulus; symptoms include emotional instability, apprehension, fatigue.

#### 300.00 Anxiety state, unspecified

Anxiety: Anxiety:

neurosis state (neurotic)

reaction Atypical anxiety disorder

AHA: 10, '02, 6

#### 300.01 Panic disorder without agoraphobia

Panic: Panic: Attack state

Excludes panic disorder with agoraphobia (300.21)

DEF: Neurotic disorder characterized by recurrent panic of anxiety, apprehension, fear or terror; symptoms include shortness of breath, palpitations, dizziness, faintness or shakiness; fear of dying may persist of fear of other morbid consequences.

#### 300.02 Generalized anxiety disorder

300.09 Other

#### √5th 307.8 Pain disorders related to psychological factors

#### 307.80 Psychogenic Pain, site unspecified

#### 307.81 Tension headache

headache; NOS (784.0) Migraine (346.0-346.9)

AHA: N-D, '85, 16

#### 307.89 Other

Code first to type or site of pain

pain disorder exclusively attributed to psychological factors (307.80) Psychogenic pain (307.80)

#### √4<sup>th</sup> 309 Adjustment reaction

Includes adjustment disorders

Reaction (adjustment) to chronic stress

acute reaction to major stress (308.0-308.9) neurotic disorders (300.0-300.9)

#### 309.0 Adjustment disorder with depressed mood

Grief Action

affective psychoses (296.0-296.9) neurotic depression (300.4) prolonged depressive reaction (309.1) psychogenic depressive psychosis (298.0)

#### 309.1 Prolonged depressive reaction

affective psychoses (296.0-296.9) brief depressive reaction (309.0) neurotic depression (300.4) psychogenic depressive psychosis (298.0)

#### **V5th 309.2 With predominant disturbance of other emotions**

#### 309.21 Separation anxiety disorder

DEF: Abnormal apprehension by a child when physically separated from support environment; byproduct of abnormal symbiotic child-parent relationship.

#### 309.22 Emancipation disorder of adolescence and early adult life

DEF: Adjustment reaction of late adolescence; conflict over independence from parental supervision; symptoms include difficulty in making decisions, increased reliance on parental advice, deliberate adoption of values in opposition of parents.

#### 309.23 Specific academic or work inhibition

#### 309.24 Adjustment disorder with anxiety

#### 309.28 Adjustment disorder with mixed anxiety and depressed mood

Adjustment reaction with anxiety and depression

#### 309.29 Other

Culture shock

#### 309.3 Adjustment disorder with disturbance of conduct

Conduct disturbance Destructiveness – as adjustment reaction

Excludes destructiveness in child (312.9)

disturbance of conduct NOS (312.9)

dissocial behavior without manifest psychiatric disorder (V71.01-V71.02) personality disorder with predominantly sociopathic or asocial manifestations (301.7)

#### 309.4 Adjustment disorder with mixed disturbance of emotions and conduct

#### √5<sup>th</sup> 309.8 Other specified adjustment reactions

#### 308.81 Posttraumatic stress disorder

Chronic posttraumatic stress disorder Concentration camp syndrome

Posttraumatic stress disorder NOS
Post-traumatic stress disorder (PTSD)

Excludes acute stress disorder (308.3)

posttraumatic brain syndrome:

nonpsychotic (310.2) psychotic (293.0-293.9)

DEF: Preoccupation with traumatic events beyond normal experience; events such as rape, personal assault, combat, natural disasters, accidents, torture precipitate disorder; also recurring flashbacks of trauma; symptoms include difficulty remembering, sleeping, or concentrating, and guilt feelings for surviving.

#### 309.82 Adjustment reaction with physical symptoms

#### 309.83 Adjustment reaction with withdrawal

Elective mutism as adjustment reaction Hospitalism (in children) NOS

309.89 Other

#### 309.9 Unspecified adjustment reaction

Adaptation reaction NOS Adjustment reaction NOS

#### v5th 311 Depressive disorder, not elsewhere classified

Depressive disorder NOS Depressive state NOS

Depression NOS

Excludes acute reaction to major stress with depressive symptoms (308.0) affective personality disorder (301.10-301.13)

Affective psychoses (296.0-296.9)

brief depressive reaction (309.0)

depressive states associated with stressful events (309.0-309.1)

disturbance of emotions specific to childhood and adolescence, with misery

and unhappiness (313.1)

mixed adjustment reaction with depressive symptoms (309.4)

neurotic depression (300.4)

prolonged depressive adjustment reaction (309.1)

psychogenic depressive psychosis (298.0)

AHA: 4Q, '03, 75

#### √5th 314.0 Attention deficit disorder

Adult

Child

#### 314.00 Without mention of hyperactivity

Predominantly inattentive type

AHA: 10, '97, 8

#### 314.01 With hyperactivity

Combined type

Overactivity NOS

Predominantly hyperactive/impulsive type

Simple disturbance of attention with overactivity

AHA: 10, '97, 8

#### 314.1 Hyperkinesis with development delay

Development disorder of hyperkinesis

Use additional code to identify any associated neurological disorder

#### 314.1 Hyperkinesis with development delay

Developmental disorder of hyperkinesis

Use additional code to identify any associated neurological disorder

#### 314.2 Hyperkinetic conduct disorder

Hyperkinetic conduct disorder without development delay

Excludes hyperkinesis with significant delays in specific skills (314.1)

314.8 Other specified manifestations of hyperkinetic syndrome

#### 314.9 Unspecified hyperkinetic syndrome

Hyperkinetic reaction of childhood or adolescence

NOS

Hyperkinetic syndrome NOS
